### Areas of Interest:

Green Chemistry Regulatory Reform

Dr. Sinsheimer is the Executive Director of the UCLA Sustainable Technology & Policy Program (STPP), an interdisciplinary initiative of the UCLA Schools of Public Health, Law, Engineering, and Business. The focus of STPP is to identify the viability of safer substitutes to hazardous chemicals, products, and industrial processes and promote their use. Before taking this post, Dr. Sinsheimer directed the Pollution Prevention Center at Occidental College where his research and policy work led to the phase-out of toxic chemicals in dry cleaning and the phase-in of the most environmentally benign alternatives. Dr. Sinsheimer's research interest focuses on identifying safer substitutes for hazardous products and industrial processes, zero-emission energy generation from renewable resources, energy-efficiency evaluation, alternatives analysis methodology, and regulatory policy reform promoting sustainable technologies.
