Purification and Properties of Aldehyde Dehydrogenase

from Clostridium kluyveri

A dissertation submitted in partial satisfaction of the

requirements for the degree Doctor of Philosophy

in Chemistry

by

Linda Tombras Smith.

Committee in charge:

Professor Nathan O. Kaplan, Chairman

Professor William S. Allison

Professor Robert C. Fahey

Professor Percy J. Russell

Professor Gordon H. Sato

1977

The dissertation of Linda Tombras Smith is approved, and it is acceptable in quality and form for publication on microfilm:

*Robert C. Abbey*

*William A. Allison*

*Gordon Sato*

*Ray Russell*

*N. O. Kaplan*

Committee Chairman

University of California, San Diego

1977

## TABLE OF CONTENTS

		Page
	List of Abbreviations . . . . .	viii
	List of Figures . . . . .	x
	List of Tables . . . . .	xiii
	Acknowledgments . . . . .	xv
	Vita, Publications and Field of Study . . . . .	xvi
	Abstract . . . . .	xvii
I	Introduction . . . . .	1
	A. Clostridia - General Description . . . . .	1
	B. Metabolism of Clostridia . . . . .	3
	C. Enzymes of Energy Metabolism of <u>Clostridium kluyveri</u> . . . . .	10
II	Materials and Methods . . . . .	13
	A. Growth of <u>Clostridium kluyveri</u> . . . . .	13
	B. Methods of Assay . . . . .	13
	1. Aldehyde Dehydrogenase Activity . . . . .	14
	2. Alcohol Dehydrogenase Activity . . . . .	15
	3. NADH Oxidase Activity . . . . .	15
	4. Phosphotransacetylase Activity . . . . .	16
	5. Determination of Protein Concentration . . . . .	16
	C. Preparation and the Determination of the Concentration of Pantetheine . . . . .	17
	D. Synthesis and Determination of the Concentration of Acetyl Coenzyme A . . . . .	18
	E. Affinity Chromatography . . . . .	19
	1. Coupling of Amines to Sepharose . . . . .	19
	2. Amide Bond Synthesis . . . . .	20
	3. Preparation of a Sepharose-Bound Acetaldehyde Derivative . . . . .	20

	Page
4. Preparation of Sepharose-Bound Desulfo-Coenzyme A . . . . .	21
5. Binding of Aldehyde Dehydrogenase to Sepharose-Bound Ligands . . . . .	22
F. Purification Procedure for Aldehyde Dehydrogenase . . . . .	23
G. Polyacrylamide Gel Electrophoresis . . . . .	26
H. Active Enzyme Centrifugation . . . . .	28
I. Stokes Radius Determination . . . . .	29
J. Thiol Specificity . . . . .	30
1. Charcoal Treatment . . . . .	30
2. Alkaline Phosphatase Treatment . . . . .	31
3. Pyrophosphatase Treatment . . . . .	32
4. Product Identification . . . . .	32
K. Rapid Kinetic Measurements . . . . .	33
L. Methods for Kinetic Analysis . . . . .	33
1. General Methods . . . . .	34
2. Determination of the Concentration of Substrates . . . . .	36
M. Purification Procedure for Phosphotransacetylase . . . . .	36
N. Phosphotransacetylase Activity Stain for Polyacrylamide Gels . . . . .	37
III Results and Discussion . . . . .	39
A. Syntheses . . . . .	39
1. Preparation of Pantetheine . . . . .	39
2. Synthesis of Acetyl Coenzyme A . . . . .	40
3. Preparation of Sepharose-Bound Desulfo-Coenzyme A . . . . .	43
B. Purification of Aldehyde Dehydrogenase . . . . .	46
1. Extraction of the Enzyme . . . . .	46
2. Precipitation of Activity . . . . .	49
3. Desalting by Gel Filtration . . . . .	52

	Page
4. DEAE-Cellulose Chromatography . . . . .	52
5. Concentration Step . . . . .	57
6. Calcium Phosphate Gel Adsorption . . . . .	59
7. Gel Filtration . . . . .	59
8. Polyacrylamide Gel Electrophoresis of Aldehyde Dehydrogenase . . . . .	62
9. Discussion of the Purification Scheme . . . . .	62
C. Binding of Aldehyde Dehydrogenase to Sephacryl-SB-4B Sepharose-Bound Ligands . . . . .	69
D. Stabilization of Aldehyde Dehydrogenase . . . . .	77
E. Molecular Weight Determination . . . . .	81
1. Determination of Sedimentation Coefficient . . . . .	81
2. Determination of Stokes Radius . . . . .	86
3. Calculation of Molecular Weight and Frictional Ratio . . . . .	87
4. Summary of Ultracentrifugation and Gel Filtration Studies . . . . .	91
F. Aldehyde Specificity . . . . .	93
G. Pyridine Nucleotide Specificity . . . . .	94
H. Pyridine Nucleotide Stereospecificity . . . . .	97
I. Thiol Specificity . . . . .	98
1. Utilization of Various Thiols . . . . .	98
2. Spectral Studies and Treatment with Charcoal . . . . .	100
3. Reaction in the Presence of Phosphotransacetylase . . . . .	104
4. Alkaline Phosphatase Treatment . . . . .	105
5. Pyrophosphatase Treatment . . . . .	105
6. Thioester Formation . . . . .	105
7. General Discussion . . . . .	111
J. Rapid Kinetic Measurements . . . . .	113
K. Kinetic Analysis . . . . .	116
1. Initial Velocity Studies . . . . .	116
2. Product Inhibition . . . . .	139
3. Reverse Reaction . . . . .	151
4. Substrate Inhibition . . . . .	155
5. Discussion of Kinetic Analysis . . . . .	161

	Page
L. Purification of Phosphotransacetylase . . . . .	167
1. Results and Discussion of Purification Procedure . . . . .	167
2. Polyacrylamide Gel Electrophoresis of Phosphotransacetylase . . . . .	172
References . . . . .	179
Appendix . . . . .	187

## ACKNOWLEDGMENTS

I would like to thank Dr. Nathan O. Kaplan for his scientific guidance, support, and encouragement. Dr. G. D. Novelli is gratefully acknowledged for providing the Clostridium kluyveri cells. Thanks also to Dr. J. Everse for assistance with the ultracentrifugation and stopped-flow studies. Drs. G. M. Smith and C. Y. Lee ran and assisted in the interpretation of the nuclear magnetic resonance spectra. Thanks to Dr. Y. Levin for providing his expertise in the field of affinity chromatography. Drs. L. J. Arnold and K. S. You are acknowledged for their helpful advice.
